stabivit VINOFORM 1kg

Vinoform® Stabivit

Specially combined product for stabilising wines after fermentation. Contains potassium metabisulphite, potassium sorbate and ascorbic acid in ideal proportions. Compound product = simple to use (no separate quantities to weigh). Not only does it prevent bottle fermentation but it also provides protection against oxidation and mould. The product may turn a bit yellow during storage and become granular but this does not impede its effectiveness.

Dosage: 5 g/10 litres of wine, to be dissolved in a small amount of liquid and then mixed well with the wine.

vinoform®

Specification

Packing dimensions and weight:

Weight	1.01 kg
Length	35.5 cm
Height	8.4 cm
Width	20 cm
EAN code	5425000396710
