## tannin Vinfoerm Tannoblanc 100 g

Tannin compound, particularly suitable for white wines. It has very good antioxidant properties and a bouquet enhancing effect. Also has a slight fining action. Dosage: 0.5-1g/10 litres.

### How to determine which fining agent to use?

Trial and error is still one of the easiest and best methods; take a few samples from the wine that needs to be clarified/fined and put them in test tubes. Add a few millilitres or grammes of a different fining agent to each test tube. Another test tube of wine/juice with pecto enzyme and one with alpha-amylase (in starchy fruit) are helpful. Leave to clear for a few hours and you will see which fining agent gives the best result!

**vinfoerm®**

### Specification

Packing dimensions and weight:

Weight	0.105 kg
Length	17 cm
Height	2.4 cm
Width	11.2 cm
EAN code	5425000396994
