

## Ss Brewtech™ Brewmaster Bucket 53 I (14 gal) °C

The Brew Bucket was the very first product Ss Brewtech ever invented. Essentially they were home brewers tired of the fact that there were no affordable quality 304 stainless steel fermenters on the market. After all, stainless steel is the superior material for sanitary fermentation. You don't see local craft breweries fermenting in plastic for a reason. Stainless steel is more sanitary than plastic and safer than glass.

The signature conical base of the Brew Bucket minimizes potential off-flavor yeast contact during fermentation, and allows the yeast to concentrate for a clean transfer. All sizes of brew buckets fit nicely into standard chest freezers for convenient temperature controlled fermentation.

Brewmaster Editions of the Brew Buckets feature a weldless thermowell and LCD thermometer.

### Kombucha

For many of the same reasons the iconic Brew Bucket has become the go-to fermenter in beer, it is quickly becoming the industry standard for small batch professional-level kombucha fermentation.

Key features such as the 100% percent width removable lid that makes for easy SCOBY removal, rotatable racking arm to avoid the pickup of adjuncts, and a quality stainless steel construction make the Brew Bucket near perfect for Kombucha fermentation.

- Conical base with rotatable racking arm
- Weldless thermowell with LCD thermometer
- 1/2" mini ball valve for transfers and gravity samples
- Wide lid with secure spring clamps
- 17 mm port in lid for 1/2" blow-off tubing
- Welded carry handles
- Etched volume markings gals/liters
- Patent pending

### Specifications:

- 304 stainless steel
- Capacity: 14 gal (52.99 liter)
- Diameter: 16" (40.64 cm)
- Height: 24" (60.96 cm)

### Specification

#### Packing dimensions and weight:

Weight	11.5 kg
Length	46.5 cm
Height	67.5 cm
Width	47.5 cm
EAN code	5420069837426
