## Airlock for barrels 30-210 l

Cylindrical model of excellent quality. Easy to clean. Recommended for larger barrels (from 50 litres).

- For barrels 30-210 l
- Dimensions (Ø x H): 8 cm x 11 cm
- Suitable for an opening of 17 mm

### What does an airlock do?

**Filling the airlock with a little water** makes it act as a siphon; the water closes the beer or wine off from the outside air; hence preventing outside bacteria from entering. However it allows the carbon dioxide formed during fermentation to escape through the airlock because of the excess pressure.

Twin-bubble airlocks are the cheapest, but these are harder to clean than the cylindrical models. With volumes of 50 l or more, the use of cylindrical airlocks is essential for the increased flow of carbon dioxide to be processed. The water in the airlock evaporates; regularly checking and refilling is necessary. The airlock can also be filled with a disinfecting solution instead of ordinary water.

### Specification

Packing dimensions and weight:

Weight	0.09 kg
Length	22.4 cm
Height	9 cm
Width	9 cm
EAN code	5420069838454
