

Ss Brewtech™ Two Quick Disconnect kit

Our new FTSs quick disconnect kit is the perfect way to increase the efficiency of your cooling system while also making it easier to detach your fermenter's chiller coil for easy cleaning.

The neoprene sleeve both insulates and wicks away condensation to reduce temperature loss in your FTSs tubing. The sleeve is 10 feet (3.05 m) in total length and can be cut to custom lengths to adapt to any FTSs setup. Once cut, use the included Velcro strip to secure the sleeve to the quick disconnect fitting.

The quick disconnect fitting was custom tooled for Ss Brewtech with 3/8" hose barbs and features all EPDM seals, which maintain sealing properties at low temperatures. In addition, they include all stainless internal hardware, and integrated valves in both the male and female components to prevent spilling. These fittings work great with either glycol or chilled water from a cooler.

- Two Quick Disconnects:
 - (1) Neoprene Sleeve: 10 feet (3.05 m)
 - (2) Quick Disconnect Fittings
 - (4) Velcro Strips
 - (8) Stainless hose clamps

Specification

Packing dimensions and weight:

Weight	0.494 kg
Length	16 cm
Height	19 cm
Width	11 cm
EAN code	5420069839031
