

## Cooling group MiniChilly 0.9 kW

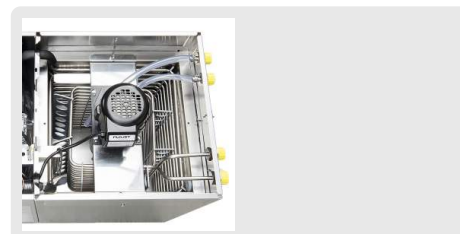

The small cooling unit MiniChilly, made of stainless steel, is an ideal solution for micro-breweries, hobby brewers and smaller wineries. Due to the simple construction the unit is easy to fill and to install.

- Passive cooling of fermentation and storage tanks
- Cooling of must and wine for pre-clearing and cristal stabilisation
- Cooling of rooms and storage halls - with additional fan coils
- With stainless steel coil (option): direct cooling of liquids (active cooling)

### Specifications:

- Compact cooling unit made of stainless steel
- For low water temperature ranges down to -6°C (21,2°F)
- Thermostatic controller (Carel)
- Complete cooling water circuit containing a water tank and a submersible pump with stirrer (50/60Hz)
- Evaporator made of stainless steel
- Fill level display and tank draining outside the unit
- Stainless steel housing
- Separate pump switch next to the controller
- Refrigerant R134a
- Ice-bank built at 0°C water temperature
- It is required to add Glycol (30 - 35%) to the cooling water by outlet temperatures below 0°C (building of an ice-bank not possible then)
- Option: stainless steel coil for direct product cooling can be integrated, inner tube diameter 10mm
