

## Ss Brewtech™ Ss Glycol Chiller 75 l (20 gal) 3/4 HP, 230 V – EU version

Art. 025.500.75

<https://www.brouwland.com/en/qr/025.500.75>

Introducing the Ss Glycol Chiller 3/4 HP, which will maintain lager temperatures and enable crash cooling for up to 6 vessels, even in relatively high ambient temperatures. The chiller was designed to integrate seamlessly with the FTSS kits to provide a complete temperature control system.

Since each FTSS kit includes its own dedicated temperature controller, pump, and tubing; each vessel can be connected to the glycol chiller with its own independent loop. The parallel design of this set-up offers the ability to ferment at ale temperatures in one vessel, and maintain precise serve or crash cooling temperatures in another vessel. The Glycol Chiller can also be paired with the Ss Brite Tanks to hold beer at serving temperatures. This system offers both flexibility and expandability for your home brewery.

- Attach up to 6 FTSS kits at one time
- Capable of crash cooling and lagering
- Use a well-blended solution of 65% distilled water/35% glycol
- Assuming one vessel is crash cooled at a time:
  - Chills up to 6 - 1 bbl Chronicals or Unitanks
  - Chills up to 4 - 2 bbl Unitanks
  - Chills up to 2 - 3.5 bbl Unitanks

Vertical chassis layout:

- 120 VAC 3/4 horsepower compressor
- 5327 BTUs/Hr
- 22 gallon reservoir with sight glass
- R134a refrigerant
- Casters included
- Noise level: 40 dB
- Made in France
- Dimensions W x D x H = 23.5 x 23.5 x 33.5" (59.69 x 59.69 x 85.09 cm)

**Note:** The chiller is designed to operate at a maximum fill level of 90% reservoir capacity. Overfilling the unit could result in damage to electrical components and void its warranty.

### Specification

Packing dimensions and weight:

Weight	51.5 kg
Length	70 cm
Height	94 cm
Width	70 cm
EAN code	5420069839703
