

Viking Caramel 600 - 550-650 EBC - 5 kg

Viking Caramel Malts are made from green malt. A high degree of caramelization is characteristic of this malt. The amyolytic activity of Caramel Malts is zero. Maillard products formed in the process can act as antioxidants and contribute to flavor stability. Caramel Malts usually improve foam quality and head retention. Contains gluten.

Applications

Caramel Malts are well suited for winter beers, ale-type beers and other aromatic beers like dark lagers and stouts. Small amounts can be used for color adjustment and flavor enrichment of pale lagers as well.

Did you know?

Viking Malt's caramel malts are made from green malt taken from germination just before kilning. The raw material for our caramel malts is exactly the same as for high quality pilsner malt.

MALT SPECIFICATION
