

## Brewtools starter pack 3-wegs setup

The recommended accessories to get you started using the Brewtools pro systems.

The package includes the efficient counterflow cooler, an extra 3-way valve to make you able to choose if you return the cooled wort to the tank creating a whirlpool or pump directly to the fermenter. The third 3-way valve makes it possible to clean the system without disconnecting hoses.

The adjustable dip tube is included in this package for optimal control during pumping to fermenter.

A third sensor gives you exact measurements of the wort returning from cooling. The necessary fittings and accessories are also included.

Fittings for connecting a sparge water heater is not included.

### Included in the package:

- 2 pcs 3-way ball valve, TC 34 mm DN15
- 1 pcs dip tube, adjustable, TC 34 mm
