

Brewtools starter pack 4-wegs setup

Starter pack for a complete 4-valve setup.

The package includes our efficient counterflow cooler, three extra 3-way valves to make you able to choose if you return the cooled wort to the tank creating a whirlpool or pump directly to the fermenter, being able to bypass the counterflow cooler, and not having to disconnect valves during cleaning.

Our adjustable dip tube is included in this package for optimal control during pumping to fermenter. We also include a sight glass in this package.

A third sensor gives you exact measurements of the wort returning from cooling. The necessary fittings and accessories are also included.

Fittings for connecting a sparge water heater is not included.

Included in the package:

- 3 pcs 3-way ball valve, TC 34 mm DN15
- 1 pcs dip tube, adjustable, TC 34 mm
- 1 pcs counterflow cooler, Pro
- 1 pcs TC 34 mm sight glass, modern
- 3 meter silicone tube 16 x 25 mm, clear
